

ABSTRACT OF THE PHYSICO-CHEMICAL LITERATURE IN JAPAN

AUTHOR INDEX

VOL. XI

1937

- Abe, M. Theory of the activity coeff. in concd. aqueous soln. of strong electrolyte. 234.
- Abe, S. See Okamoto, G.
- Adzumi, H. Studies on the flow of gaseous mixts. through capillaries. I. The viscosity of binary gaseous mixts. 225. [226.
- II. The molecular flow of gaseous mixts. [226.
- III. The flow of gaseous mixts. at medium pressures. 226. [226.
- On the flow of gases through a porous wall.
- Akai, Y. See Fuseya, G.
- Akamatsu, M. The influence of org. substances on zinc cell. 1. The influence of acetic and formic acid. 142.
- Akamatsu, H., and Sameshima, J. Studies of the oiliness of the liquids. II. Friction coeffs. of the films of mono- and poly-molecular layers. 148.
- Ando, H. Prepn. of silica gel. 237.
- Adsorption of silica gel. 237.
- Aoki, H. See Kikuchi, S. [230.
- Excitation of gamma rays by fast neutrons.
- Araki, G. Theory of fine structure of helium. 139.
- Theory of si-triplet of alkaline earth. 229.
- Ariyama Kanetaka. On the electron theory of metal. 226.
- Ariyama Kyoze. A note on the osmotic coeff. and the activity coeff. at the surface. 134.
- Theory of neg. adsorption of Debye-Hückel electrolyte. 143.
- A theory of surface tension of Debye-Hückel electrolyte. 143. [146.
- A theory of surface tension of ternary solns.
- A note on the theory of surface tension of ternary solns. 151. [of inorg. acids. 151.
- A theory of surface tension of aqueous solns.
- Arii, K. On the sorption of chlorine by active charcoal. 1. Relation between the sorption amts., the temp., and the pressure. 69.
- Azuma, T. See Harada, T.
- Dōno, T. Chem. investigations of the ancient metallic implements in orient. IX. On the ancient Chinese copper implement. V. On the ancient Chinese bronze implement. VII. Especially, on the transitional period between the copper and bronze ages in ancient China. (Supplementary). 125.
- VIII. On the ancient Chinese copper implements. IV. Especially, on the existence of the copper age in ancient China. (Supplementary). 127.
- Edmund, S. The magnetic properties of elements. A survey. 120.
- Fuchino, K. Polymorphy. 120.
- Fujioka, Y., and Tanaka, Y. Molecular spectrum of MgD. 134.
- Fujiwara, T. Fine structure of the Laue X-ray pattern obtained by the method of convergent X-rays. 135.
- Fukamoto, Y. On the continuous absorption spectra of some polyatomic molecules. 136.
- Fukushima, I. See Ishida, Y.
- Funakoshi, O. See Ishibashi, M.
- Fuseya, G., Miyakawa, T., and Akai, Y. Measurement of the potential of zinc electrode in dry cells. — See Sasaki, K. [1. 16.
- Futagami, T. On the electric explosion spectrum of metals. 132.
- Hagisawa, H., and Takai, T. Studies of potassium bisulphate. 136.
- Hagitani, A. See Kobayashi Masahisa.
- Hamada, T. Spectro-photometrical measurement of temp. of pos. column. 134.
- Han, K. See Matsuno, K.
- Studies on the Raman effect of org. substances. VII. Raman effect of furane derivatives. 128.
- Harada, G. Effects of short waves and supershort waves on permeability of collodium membrane. 150.
- and Isida, T. Electrolyte effect of collodium membrane on permeability. 150.
- Abnormal diffusion. 150.
- Harada, T., and Azuma, T. Studies on the high pressure mercury lamps. II. 133.
- and Azuma, T. Energy distribution and behavior of mercury spectrum at high vapor pres-

- sure. 231.
- Hasegawa, N.** See Ishikawa, F.
- Hayami, N.** On the Becquerel effect of copper oxide electrode in alkali solns. 236.
- Hayashi, T.** The fine structure of X-ray K-absorption of Ni. 134.
- On the non-diagramlines of K-spectra of the elements Ni and Cu. 136.
- On the K-absorption spectra of Ni. II. 136.
- K-absorption spectra of copper. 222.
- Hazato, G.** See Tominaga, H.
- Higasi, K.** Polarity of chem. compds. IX. 58.
- Higuti, I.** On the vapour pressures of $\text{Na}_2\text{SO}_4 \cdot 10\text{D}_2\text{O}$ and satd. solns. of Na_2SO_4 , $\text{Na}_2\text{SO}_4 \cdot 7\text{D}_2\text{O}$ and $\text{Na}_2\text{SO}_4 \cdot 10\text{D}_2\text{O}$ in heavy water. 140.
- Studies on the sorption of gases by titania gel. III.—Relation between the vapour pressure and the sorbed amt. of ammonia. 145.
- Studies on the sorption of gases by titania gel. IV. The sorption of water vapour and the capillary condensation as a part of the sorption phenomenon. 238.
- Hirasawa, H.** See Uemura, T.
- Hirata, F.** On the rigidity and the constitution of thermoreversible gel. 239.
- Hirota, K.** See Okamoto, G.
- Hiruma, K.** See Komagata, S.
- Hiyama, S.** See Ishida, Y.
- Honda, K., and Simizu, Y.** On the variation of diamagnetic susceptibility of water due to temp. 58.
- Hori, S.** See Kitawaki, I. 58.
- Horiba, S.** Thermal analysis of chem. reaction velocity. 236.
- Horiuchi, J.** See Okamoto, G.
- The exchange reaction between chloroform and heavy water. 121.
- and Okamoto, G. Detn. of the number of interchangeable hydrogen atoms in complex salts. 129.
- Husimi, K.** See Kikuchi, S. 129.
- Imai, S.** See Shibata, E.
- Imai, Y.** A study of Donnan's membrane potential difference. (Supplement). 144.
- Imanishi, S.** The near ultra-violet $\Sigma \rightarrow \Sigma$ band system of gold deuteride, and a new analysis of gold hydride spectrum. 136.
- Inai, T.** See Takéuchi, T.
- Inamura, K.** See Takéuchi, T.
- Inouye, Y.** See Mizushima, S.
- Isagawa, Y.** See Maeda, K.
- Isemura, T.** Rhythmic ppts. VII. On the rhythmic ppts. of lead iodide in silicic acid gel. 123.
- Rhythmic ppts. VIII. On the rhythmic ppts. of lead iodate in gelatine gel. 223.
- Rhythmic ppts. IX. On the rhythmic ppts. of silver carbonate, silver iodate, and silver arsenite in gelatine gel. 225.
- Ishibashi, M., and Funakoshi, O.** Analysis by means of radioactive indicator. II. The detn. of the solubility of lead chromate. 55.
- Ishida, T.** See Harada, G.
- Ishida, Y., Fukushima, I. and Suetsugu, T.** On the redetn. of the elementary charge by the oil drop method. 227.
- , Hiyama, S. and Kubota, H. Stark effect of ionized helium. 230. [125.]
- Ishikawa, T.** The viscosity of mixed salt solns.
- Ishikawa, F., and Hasegawa, N.** On the activity coeff. of thallos thiocyanate in some salt solns. 140.
- Itoh, J.** The production and absorption of cosmic ray secondary particles in lead. 126.
- See Kikuchi, Seishi.
