

ABSTRACT OF THE PHYSICO-CHEMICAL LITERATURE IN JAPAN

AUTHOR INDEX

VOL. XV

1941

- Akiyama, K.** Analysis of calcined lime by X-rays. 56.
— Synthesis and X-ray analysis of gehlenite and anorthite. 56.
- Akutsu, J.** See Kimura, M.
- Andersson, Karl.** See Hedvall, J. Arvid.
- Aomi, N.** See Kimata, S.
- Aono, T.** Studies on reactions between gas solid. VII. Nitrogenation of calcium carbide and the kinetic discussion. 186.
— Cuprene (I—III). 194.
- Aoyama, S.** Studies on fluorine at low temperatures, XI. Reaction of fluorine and oxygen by a glow discharge at low temperatures. 184.
- Arri, K.** On the sorption of phosgene by active charcoal. I. The sorption isotherm. 193.
- Asada, Y.** Studies on alunite. VIII. The mechanism of the thermal decomposition of alunite. I. 59
— IX. Relationship between the dehydration rate and melting point of potassium alum. 59.
- Asai, C.** Studies on the photoconductivity of semi-conducting layers composed of some heavy-metal sulphide or selenide. III. The relation between the structure and the photoconductivity of some layer composed of bismuth sulphide. 189.
- Asao, S.** Behaviour of the foreign metal particles in the composite photo-cathode. 134.
- Fujita, S.** See Arai, K.
- Goto, R.** Osmosis. II. Osmosis of salt solution. 64.
- Goto, R.** See Horiba, S. Kimata, S.
- Hagisawa, H.** On the dissociation constant of hydroxylamine. 189.
— On the dissociation constant of hypochlorous acid. 67.
- Hagiwara, T.** The slowing down of neutrons from (Ra+Be) in a large volume of water. 61.
- Harasima, A.** On the electrical resistance of liquid sodium. 133.
— The electric resistance of liquid sodium. 182.
- Harisaki, Y.** See Sata, N.
- Hasegawa, T.** Action of gelatin-gels in sodium chloride solution. 68.
- Hedvall, J. Arvid.** Reactions in solid state between calcium oxide and different preparations of titanium dioxide. 187.
- Higasi, K.** Solvent effect on the dipole moment of disubstituted benzenes. 182.
- Higuti, I.** On the critical condition for the drop formation and the capillary condensation. 192.
- Hiraki, Y.** Reactions of nitric oxide and oxygen at low pressures and low temperatures. I—II. III. IV. 70.
— See Sasaki, N.
- Hirano, K.** See Nishibori, E.
- Hirasawa, N.** See Tsuzuki, Y.
- Hirone, T.** On the constitution of ternary alloys. 55.
- Hiyama, S.** See Ishida, Y.
- Horiba, S.** On explosive reactions of gases. I. Thermal explosion of oxyhydrogen gas at low pressures. 60.
- Horiuti, J.** On the mechanism of hydrogen electrode process: Reply to the criticism of Frumukin and his collaborators. 65.
- Igarasi, I.** Solution pressure of pure Al. II. 64.
- Inagaki, T.** Studies on silvering of glass, effect of organic acids on the formation of a silver mirror. 60.
- Inoue, I.** See Kanai, T.
- Inuzuka, H.** Crystal structure of silicon monoxide. 56.
— On the study of cristobalite. 57.
— Silicon monoxide (II) The change of silicon monoxide by heating. 184.
- Isemura, T.** Studies on the liquids. IX. Measurements of the static friction coefficients of cyclic compounds for glass surfaces. 67.
— Studies on the oiliness of liquids. X. The friction coefficients of mono- and multi-molecular layers. 192.
- Ishida, Y.** A note on the Stark-effect of anomalous lines of mercury spectrum. 62.

- Ishihara, S.** Takei, T.
- Ishikawa, F.** The velocity of reduction of silver chloride by hydrogen and deuterium. 186.
— Velocity of adsorption by magnesia of light and heavy water vapours. 69.
- Ishikawa, H.** See Kobayashi, K.
- Isogai, N.** The mechanism of combustion of hydrocarbons and knocking in the gasoline engines. 129.
- Itô, H.** On the anodic behaviour of Cu_6Sn_5 . 66.
Studies on the anodic behaviour of tin. IV. 65.
- Itoh, J.** Analysis of experimental data for β -disintegration. 131.
— Radioactivity of ^{68}Zn . 130.
— γ -Ray emitted from Rn and MsTh- I and their daughter elements. 187.
— See Watase, Y.
- Iwai, S.** See Matsumoto, T.
- Iwase, E.** Studies on the cathodo-luminescence of inorganic solids containing manganese. 63.
- Iwase, K.** See Oyama, Y.
- Jono, W.** Studies on explosion reaction. The reaction between carbon monoxide and oxygen. I. 184.
- Kakinoki, J.** The investigation of thin films of cellulose and its derivatives by electron diffraction. I. On the three halos. II. On the crystalline patterns. 135.
- Kikuti, S.** The specific gravity of the solution of metallic sodium in liquid ammonia. 57.
- Kameyama, N.** Measurement of true density of graphitised carbon. I. 128.
- Kamiike, O.** See Negishi, R.
- Kanai, T.** Preparation of Gold sol. 191.
- Kanamori, I.** See Ishikawa, F.
- Kanda, E.** See Nakamura, S.
- Kaneko, S.** Deposition of metallic powder by electrolysis. 66.
— Electrolysis and diffusion. 190.
— The change of the concentration in the solution by electrolysis. 66.
- Katayama, T.** See Hirone, T.
- Kawamura, H.** See Nishibori, E.
- Kawamura, K.** See Kaneko, S.
- Kimata, S.** On explosive reaction of gases. I. Explosion limits of oxyhydrogen gas. 60.
- Kimura, M.** On the reflection of slow neutron by crystals. 130.
— On the scattering of slow neutrons by some elements. 130.
- Kimura, O.** See Negishi, R.
- Kimura, Y.** See Tsuzuki, Y.
- Kitagawa, H.** Determination of the thermomolecular pressure in hydrogen gas at relatively high temperatures. 183.
- Kobayashi, K.** On the catalytic decomposition of neutral salts with Japanese acid clay and other minerals. I. On the action of Japanese acid clay. 194.
- Kobayashi, M.** On the interaction of mesons with radiation fields. 187.
- Kodama, S.** See Igarasi, I.
- Koisumi, K.** See Nakamiya, Z.
- Komagata, S.** The degree of dissociation of xanthate solutions. 190.
- Kubo, K.** The mutual transformation of raw cellulose and cellulose hydrate. V. Stability of the celluloses and their mutual transformation. 59.
- Kubota, M.** Studies on the metallic complexes coordinating the hydroxy-compounds. I. Effect of alkali on the polyhydric alcohols or the hydroxy-acids in aqueous solution. II. Formation and absorption spectra of polyhydric alcohol-copper-alkali complex solution. III. Absorption spectra of tartaric acid-copper-alkali complex solutions. IV. Optical activity of tartaric acid-copper-alkali complex solutions and structure of the complex radicals. 133. V. Rotatory dispersion of tartaric acid-copper-alkali complexes. VI. Optical activities of mannitol-copper-alkali complexes. VII. Formation of complex salts having alkali metals as central ion. 189.
- Kuriyama, S.** See Tsukamoto, J.
- Kuroya, H.** Absorption spectra of co-ordination compounds. IV. Ethylenediamine cobaltic complexes. 132.
- Mitani, K.** See Sasaki, N.
- Matano, C.** On the frictional electricity of the fibres. I. Effect of humidity and discharge. 67.
- Matui, G.** The boiling point of Na_2SO_3 solution under decreased pressure. 183.
- Matsumoto, E.** See Shibata, Y.
- Matsumoto, T.** Silver organosol by the reaction between chlorinated oil and silver oxide. 68.
- Miwa, M.** The photodisintegration of deuterium by radium gamma rays. 131.
- Mizushima, S.** Raman effect and dipole moment in relation to free rotation. XII. Raman spectra of ethylene chlorhydrine n-propyl chloride, and n-butane in the liquid and solid states. 63.
- Morimoto, Y.** On the appearance of neon spark-lines under the influence of an external magnetic field. 62.
- Morino, Y.** See Mizushima, S.
- Murai, T.** See Kitagawa, H.
- Nagaeda, S.** On dissolving velocity of glass in basic or acidic solution and water. 185.

- Nagamiya, T. On the theory of solid helium. 55.
- Nakamiya, Z. Studies on the absorption spectrum of squalene. 187.
- Nakamura, S. Raman effect in ethane and butane. 63.
— Studies on internal rotation of ethane, propane and butane derivatives by the Raman effect. 63.
- Negishi, R. Hydrocarbons from carbide, thermodynamics. 67.
- Nishibori, E. The photoelectric emission from oxide coated cathode and the exact determination of its workfunction. 188.
- Niwa, K. Molecular weight determination of vapours of low vapour pressure substances. I. Determination of vapour pressure and molecular weight of solid and fused selenium. 54.
II. Determination of vapour pressure and molecular weight of solid tellurium. 55.
— III. Determination of vapour pressure and molecular weight of solid antimony. 55.
- Nonaka, I. On the resonance capture of slow neutrons and emission of gamma-rays II. 130.
— Relative number of gamma-ray quanta emitted per capture of a thermal neutron. 62.
— Resonance capture of slow neutrons and γ -rays. 61.
- Nukuda, H. Calculation of PH in Buffer solution on the basis of Debye-Hückel's theory. 190.
- Ogata, K. On the isotopic weight of ^{12}C . 54.
- Ogawa, E. The action of magnetised ferromagnetic catalyst. 69.
- Okazaki, A. The Faraday effect and the conductivity of electrolytic solution. 65.
- Osida, I. On the change in specific heat on melting. 191.
- Oyama, Y. Supplementary note on the absorption of a gas and the form of the bubble. 59.
- Saito, G. Behaviour of cellulose fibre in alkali solutions. XVIII Inhomogeneity of cellulose fibre. XX. The reaction between cellulose and alkali XIX. The disintegration between the internal structure and the degree of cellulose and the relation quantity of alkali taken up or the swelling degree. 185.
- Sakai, W. Approximate calculation of free energy and equilibrium constant from thermochemical value and its application. 67.
- Sakuraba, S. Aoyama, S.
- Sano, I. On the dialysis of platinum-carbonyl sol. 68.
- Sasaki, N. On an ion microscope. 182.
— Thermal decomposition of nitrogen-pentoxide by platinum surface. I, II. 69.
- Sata, N. Studies on the effects of ultrasonic waves on colloid-phenomena. VII. Experiment on the effects on cane sugar solution. 68.
- Satô, M. On the energy states of valency electrons in some metals. I, 41. Revisions to the "Nature of electrode potential of zinc and hydrogen and the mechanism of catalytic action of metal surface". 64.
- Sato, S. The heat of formation of manganese nitride. 67.
— The specific heat and dissociation heat of ammonium phosphate and the atomic heat of nitrogen. 191.
- Shibata, Y. Studies on the catalytic oxido-reduction of some metallic complex salts. XII. Reduction of quinone by hydrogen in the presence of $[\text{Pd}en]\text{Cl}_2$. 66.
- Shibata, Z. See Niwa, K.
- Shinomiya, C. Studies on the organic molecular nitro radicals and second substitution compounds. I, II. The influence of radicals on the formation of the aromatic-nitroaromatic molecular compounds. 184.
— Studies on the organic molecular compounds. V. Formation of some crystalline organic molecular compounds. 60.
- Shirai, S. Orientation of Mo crystals deposited on NaCl crystal. 192.
- Sobue, H. On the Alkali-cellulose "Pseudo-Na-Cell II." 128.
- Sogabe, T. See Sato, S.
- Suito, E. Thermal analysis of the catalytic action of colloids. (II). The effect of temperature and heat treatment of platinum sol upon the catalytic decomposition of hydrogen peroxides by colloidal platinum. 193.
— See Hagiwara, T.
- Suzuki, H. Partition of sulphur dioxide between water and some immiscible solvent. 58.
- Takagi, Y. Statistical theory of binary alloys, I. 184.
- Takeda, E. See Watase, Y.
- Takei, M. See Kameyama, N.
- Takei, T. High temperature magnetization of the ferrite. 128.
- Tamamushi, B. Catalytic activity of phthalocyanines in the autoxidation of linseed oil and methyl linoleate. 69.
- Tanaka, Y. Studies on the reaction in solid state at higher temperatures. VI. The reaction between calcium oxide and stannic oxide in solid state. 186.
— The reaction between magnesium oxide and

- stannic oxide in solid state. (Studies on the reactions in solid state at higher temperatures. V.) 59.
- Tatimori, M.** Polymerisation of tung oil. III. Molecular weight of tung oil and its polymerides. 129.
- Toda, M.** The solid states of H_2 and D_2 . 55.
- Tohmatsu, S.** See Tamamushi, B.
- Tsuchida, R.** See Kuroya, II.
- Tsukamoto, J.** Studies on glycerin as the standard liquid of high viscosity. 183.
- Tsuruta, S.** Studies on phenol-formaldehyde resins. X. Relation between the increase in viscosity and density of the phenolformaldehyde system. 183.
- Tsuzuki, Y.** Antioxygenic effects of some osonitr compounds. An interpretation of the effects from the view point of resonance. 185.
- On the absorption spectra of some substituted nitrosobenzenes and the resonance effect of the substituent. 132.
- The absorption spectra of substituted nitrosobenzenes. II. The relation between the resonance effect of the substituent and its directive force in aromatic substitution. 188.
- Uehara, H.** Studies on mixed gas of low hydrocarbons. V. Adsorption of a mixed gas. 193.
- Uehara, Y.** Fluorescent substances (VII) Fluorescence spectrum of the substances of ZnO-SiO system. 188.
- Uemura, T.** See Tsuzuki, Y.
- Umekawa, U.** See Uehara, Y.
- Uno, S.** Studies on the gypsum-urea, $4CO(NH_2)_2 \cdot CaSO_4$. I. Ternary system: $CO(NH_2)_2$ - $CaSO_4$ - H_2O . 58.
- Studies on the hygroscopicity of chemical fertilizers. I. On the hygroscopicity of gypsum-urea, $4CO(NH_2)_2 \cdot CaSO_4$. 58.
- Utiyama, R.** See Kobayashi, M.
- Wakatuki, T.** On the angular distribution of fast neutrons scattered by the atoms. III. 62.
- Wada, T.** The electric resistance of graphite. 134.
- Watase, Y.** Radialions from radioactive ^{65}Zn . 129.
- See Itoh, J.
- Yamaguchi, B.** Viscosity characteristics of lubricating oils as related to their chemical structure. 58.
- Yamaguti, K.** See Matui, G.
- Yamaguchi, S.** An electron diffraction study on corroded state of the alkali and the alkaline earth metals, Li, K, and Ca, on exposure to air. 182.
- A study of amorphous films by electron diffraction. I and II. 134.
- A study of amorphous films by electron diffraction. III. 135.
- On the electron diffraction "N Pattern" from a thin $KHCO_3$ film produced by chemical reaction. 135.
- Yamaguchi, T.** On the determination of the inner potential by electron reflection method. 57.
- Yamamoto, M.** On light figures in single crystals of nickel and copper. 57.
- Yamamoto, Y.** Optical energy-levels of Cu⁺. 187.
- Yamanouchi, T.** Radiative detachment and attachment of negative oxygen ion. 131.
- Yamasaki, K.** Absorption spectra of metal complex salts of 2,2'-dipyridyl. 132.
- Yanagihara, A.** Study on rhythmic precipitates. I. Electrical study. 68.
- Study on rhythmic precipitates. Part II.— Theory of its formation. 191.
- Yasuda, I.** See Takei, T.
- Yasumi, M.** The effect of solvents on the internal rotation of carbonic ester. 62.
- Yoshimura, K.** See Ishikawa, F.
- Yoshiyama, M.** See Niwa, K.
- Yui, N.** On the dissociation constants of hydrazine. 191.
- On the dissociation constants of sulphurous acid. 66.
