# THE REVIEW OF PHYSICAL CHEMISTRY OF JAPAN

Founded in 1926

## CONTENTS

<b>Toshihiro Nakayama, Muneco Sasaki and Jiro Osugi :</b> Pressure Effect on the EDA-Complexes Formed between Mesitylene, Hexamethylbenzene and Tetracyanoethylene in Carbon Tetrachloride .....	57
<b>Hisayuki Inoue, Kimihiko Hara and Jiro Osugi :</b> The Reaction of Nitrile with $\alpha$ -Hydrogens under High Pressure I, Dimerization and Trimerization of Malononitrile .....	64
<b>Hidemoto Nojima, Minoru Saito and Masaru Inagaki :</b> Equilibrium Distribution Coefficient of Stilbene-Azobenzene System .....	76
<b>Akira Otani :</b> Explosion Reaction of Olefins, III Explosion Reaction of <i>trans</i> -Butene-2-Oxygen Mixture .....	82
<b>Shinji Takahashi and Hiroji Iwasaki :</b> Evaluation and Correlation of the Self-Diffusion Coefficients of Gaseous Methane.....	88
<b>S. D. Hamann :</b> Comments on "Ion-Ion and Ion-Water Interactions at High Pressure" .....	95
<b>Boris S. El'yanov :</b> Some Notes in Connection with "Ion-Ion and Ion-Water Interactions at High Pressure" .....	96
<b>Masaru Nakahara and Jiro Osugi :</b> On Ionic Activity Coefficients at High Pressure .....	100

THE PHYSICO-CHEMICAL SOCIETY OF JAPAN

# THE REVIEW OF PHYSICAL CHEMISTRY OF JAPAN

(Butsuri-Kagaku no Shinpo)

Found in 1926

**President :** Wasaburo Jono

**Members of Council :**

Michio Okamoto (Chief)

Jiro Osugi

Ryozo Goto

Renpei Goto

Eiji Suito

Hiroyuki Hatano

**Board of Editors :**

J. Osugi (Chief) *Kyoto University*

R. Goto (Associate) *Kyoto Sangyo University*

E. Suito ( " ) *Osaka Institute of Technology*

S. Shida *Yokohama University*

H. Teranishi *Kyoto Technical University*

K. Suzuki *Ritsumeikan University*

K. Kuwata *University of Osaka*

S. Seki *University of Osaka*

R. Fujishiro *Osaka City University*

T. Hayakawa *Prefectural University of Osaka*

Y. Kubokawa *Prefectural University of Osaka*

S. Tsuchihashi *Kobe University*

T. Makita *Kobe University*

S. Hasegawa *Okayama University*

K. Shimizu *Doshisha University*

H. Togawa *Doshisha University*

**Secretary :**

M. Sasaki

K. Hara

M. Nakahara

S. Fukase

December 25, 1976

**Communications to the Editor** should be addressed to Board of Editors, The Physico-Chemical Society of Japan, Faculty of Science, Kyoto University, Kyoto, Japan.

**Business Correspondences** should be addressed to: Secretary, The Physico-Chemical Society of Japan, Faculty of Science, Kyoto University, Kyoto, Japan.

**Purchase Order** should be addressed to: Maruzen Co., Ltd., Nihonbashi, Chuo-ku, Tokyo, Japan.

# Tell us about how you're using fluorine compounds.

Fluorine compounds have many unique qualities. But their usages today are only the beginning; the best is yet to come.

DAIKIN is a total maker of fluorine compounds. Our series of them has been developed from Fluorspar as its basic material. And we've learned a lot along the way.

So the next time you discuss fluorine compounds, think of DAIKIN—the company with all the answers. Answers we're anxious to share.

# KS TYPE DIA APPARATUS

The super-high pressure generator developed by Kobe Steel, Ltd. is called the KS type DIA apparatus. The apparatus is used for the research on the solid state physics, synthesizing new substances, producing man-made diamonds and various other experiments in the field of high pressure on solid.

Model No.	DIA-6	DIA-10	DIA-15	DIA-20
Working pressure (kilobars)	100	80	80	60
Working temperature (°C) (under the pressure above)	1,500	1,500	1,500	1,500
Dimensions of sample holder (mm)	6×6×6	10×10×10	15×15×15	20×20×20
Capacity of high pressure press (metric ton)	250	600	1,200	2,500
Input (not including power for heating)	750W 200V 50 or 60Hz	1,500W 200V 50 or 60Hz	1,500W 200V 50 or 60Hz	1,500W 200V 50 or 60Hz
Operation period (minute/cycle)	15	20	25	30
